#### Outlook and Strategy

The resulting uncertainty around retaliation, recalculation, and redirection of trade flows complicates decision-making and planning by international business. Elevated levels of policy uncertainty will weigh on corporate confidence and consequently capex and trade. Over in Asia, we expect economists to lower growth forecasts for many Asian economies in response to the sharp tariff increases. In the months ahead, management of companies will be occupied with recalibrating, recalculating and repositioning their strategies to mitigate the impact and risk of significant disruption in global trades.
