Investment Objective and Strategy

The Fund is a unit-paying equity UITF structured as a feeder fund that aims to maximize total return by investing all or substantially all of its assets in a collective investment scheme (CIS), the Target Fund. The Target Fund aims to provide income and medium to long term capital growth by investing at least 70% of its net assets in closed-ended real estate investment trusts ("REITs") listed and traded globally. The Target Fund may also invest up to 30% of its net assets in real estate securities other than REITs and/or cash and cash equivalents. Real estate-related securities include equity, equity-related and fixed income securities of companies which derive a significant portion of their earnings from any aspect of real estate, as well as real estate-related business trusts, property trusts, hospitality trusts, and stapled securities comprising the aforementioned securities (including REITs). The Target Fund is the Manulife Global Fund – Global REIT Fund.

The Manulife Global REIT Feeder Fund is suitable for investors who are at least classified as aggressive based on their risk profile. To minimize risk and maximize returns, investors are recommended to stay invested in the Fund for at least five (5) years.

[#]Manulife Global Fund – Global REIT Fund

Outlook and Strategy

The first quarter has been marked by uncertainty and volatility, yet the Global REIT sector has demonstrated its defensive nature, starting the year positively. Despite near-term volatility and market weakness, Global REITs offer attractive relative valuations and distribution yields compared to Global Equities, which could provide investors some cushion. The global interest rate environment leans towards easing as inflation moderates and approaches target levels. We anticipate further rate cuts by major central banks in 2025, supported by stable but moderating economic data and consensus expectations.
