Outlook and Strategy

The hawkish policies and higher tariffs imposed by the US administration on its key trading partners have led to rising concerns on weaker global growth and higher inflation. We believe such policy uncertainties will persist, likely triggering further market volatility. Hence, active management will be key to navigating the uncertain market environment. In Asia ex China, we believe that certain central banks have room to continue their rate cut cycles in 2025 amid benign inflation, which should provide a supportive macro backdrop for the region.
