Outlook and Strategy

Looking ahead, we expect lower interest rates to be accommodative for economic growth. In addition, inflation appears to be coming down and unemployment remains low. However, geopolitical challenges and the upcoming US Presidential Election could pose challenges to investor sentiment. We also expect that the first half of 2024 will be more challenging for global growth. We believe we are at, or soon past peak rates and the global easing cycle has begun with global disinflation firmly in place.
