Investment Objective and Strategy

The Fund is a unit-paying balanced UITF structured as a feeder fund that aims to maximize total return by investing all or substantially all of its assets in a collective investment scheme (CIS), the Target Fund, that aims to provide income generation with potential long term capital appreciation by investing at least 70% of its net assets in preferred securities listed or traded on any regulated market in the world, which include preferred stocks (including convertible preferred stocks) and subordinated debt securities. The Target Fund is the Manulife Global Fund – Preferred Securities Income Fund.

Client Suitability

A client profiling process should be performed prior to participating in the Fund to guide prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest. The Manulife Global Preferred Income Feeder Fund is suitable for investors who want regular income payout and are at least classified as aggressive based on their risk profile. To minimize risk and maximize returns, investors are recommended to stay invested in the Fund for at least five (5) years.

Key Risks and Risk Management

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks. For a more comprehensive list of risks, please refer to the Risk Disclosure Statement.

Price Risk: The possibility for an investor to experience losses due to changes in market prices of securities.

Liquidity Risk: The possibility for an investor to experience losses due to inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.

Credit Risk: The possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner.

Reinvestment Risk: The possibility of having lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

Interest Rate Risk: The possibility for an investor to experience losses due to changes in interest rates.

Foreign Exchange Risk: This is the possibility for an investor to experience losses due to fluctuations in foreign exchange rates. This share class allows subscriptions in PHP but without any currency hedging between the PHP and USD, which is the base currency of the Fund. Thus participants in this share class are fully exposed to fluctuations in the USD/PHP exchange rate.

In accordance with the provisions in the Declaration of Trust, the Fund employs a risk management policy based on duration. The Fund may also use financial derivatives to hedge the risk exposure.

Outlook and Strategy

2024 will be a more challenging year for growth globally compared to 2023. That economic hardship won't be felt equally across income groups or geographical regions, with the US more likely to withstand the tightening in the system, as its domestic focus, strong employment profile, and relative consumer health should all provide support. As economies slow at a faster pace than inflation normalizes, the pressure to ease current monetary policy stances will intensify.

Investment Policy / Prospective Investment
